

## DRIVE SAFE PACK – PROTECTING YOU, YOUR VEHICLE AND YOUR FAMILY

- **Smash & Grab Safety Film**

Smash & grab is a type of window film that is applied to glass to reinforce it. It is designed to keep the window intact in the event of a smash & grab incident or when force is applied to the glass. When struck with force, ordinary glass will shatter and send shards of glass flying. Glass without smash & grab shatters immediately allowing the attacker to quickly reach into your car and grab valuables or potentially hijack your vehicle, whereas glass fitted with the smash & grab safety film allows you more time when a forced entry occurs to drive away to a safe location. The film also reduces glare which negatively affects your vision while driving, increases privacy making it harder to see into your vehicle and blocks 99% UV rays from potentially damaging the interior of your vehicle.

- **Crystal Fuzion**

Crystal Fuzion is an ultra – hydrophobic windshield protection treatment that literally fuses to glass. It uses state of the art nanotechnology to achieve the best results. The treated windshield will be able to withstand more abuse than untreated glass. Particles such as sand, dirt and rain simply slide off the windshield, resulting in better vision while driving in any weather condition.

- **3 In 1 Paint Protection**

Apex Nano Paint Protection contains advanced polymer layers that are applied to the vehicles paint surface. This prolongs the life of your vehicle's paintwork ensuring that it looks newer for longer.

**Protects Against:**

Acid Rain

Bird Droppings

Bug Splatter

Tree Sap

Surface Rust

Sprinkler Spotting

Fading

UV Damage

The interior protection will shield your carpets, leather, vinyl and fabrics from stains and prolong the life of your vehicle's interior. The interior protection now comes with increased Ultra Violet inhibitors as well as stain release agents for added protection from your daily regime. Lab tests have shown that vehicles protected with Apex Interior Protection will benefit from the following,

1. 49% less wear in leather seats
2. 31% less wear on vinyl interiors
3. 34% less wear on fabric seats
4. 50% less chance of ignition from cigarette butts

- **Beame**

Beame, a brand by Mix Telematics, is one of South Africa's most loved, trusted, and reliable wireless recovery devices. A small and totally affordable way of keeping your vehicle and moveable assets safe while on the move. Beame boasts one of the highest recovery rates in the vehicle tracking industry. What makes Beame even more amazing, is that it is almost impossible to locate once installed, making it difficult for criminals to remove. A tracking device will also assist in reducing your insurance monthly premiums.
